STUDIO®
PRINTS

Reactive Texture Through Print

Studio Prints collections are a contemporary take on traditional studio pottery and celebrate the creative history of ceramics. Manufactured in the UK, Studio Prints are achieved with Churchill's print process. The print is positioned directly under the glaze, creating a protective layer over the decoration. Studio Prints currently features six ranges, Homespun is a contemporary take on hand thrown pottery, while Raku is a modern interpretation of a reactive glazing process. The subtle texture of Stone recreates the effect of carving ceramics from natural stone. Mineral is inspired by the mottled surface texture of artisan pottery, Breccia emulates the crackled pattern of historical glazes and Flow imitates glaze fluidity.
